

## Discovery 1100 Circuit Card Assembly

---

This document provides the bill of material and assembly view of the DMD Discovery 1100 Controller Board.

[illegible]

## IMPORTANT NOTICE

Texas Instruments and its subsidiaries (TI) reserve the right to make changes to their products or to discontinue any product or service without notice, and advise customers to obtain the latest version of relevant information to verify, before placing orders, that information being relied on is current and complete. All products are sold subject to the terms and conditions of sale supplied at the time of order acknowledgment, including those pertaining to warranty, patent infringement, and limitation of liability.

In no event shall TI be liable for any special, incidental, consequential or indirect damages however caused, arising in anyway from the sale or use of the TI products. Products purchased from a TI authorized distributor are subject to the distributor's terms and conditions of sale.

TI warrants performance of its semiconductor products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are utilized to the extent TI deems necessary to support this warranty. Specific testing of all parameters of each device is not necessarily performed, except those mandated by government requirements. Customers are responsible for their applications using TI components unless otherwise stated, this documentation and its intellectual content is copyrighted or provided under license and may not be distributed in any form without the express written permission of Texas Instruments Incorporated.

Certain applications using semiconductor products may involve potential risks of death, personal injury, or severe property or environmental damage ("critical applications"). TI semiconductor products are not designed, authorized, or warranted to be suitable for use in life-support devices or systems or other critical applications. Inclusion of TI products in such applications is understood to be fully at the customer's risk.

In order to minimize risks associated with the customer's applications, adequate design and operating safeguards must be provided by the customer to minimize inherent or procedural hazards.

TI assumes no liability for applications assistance or customer product design. TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right of TI covering or relating to any combination, machine, or process in which such semiconductor products or services might be or are used. TI's publication of information regarding any third party's products or services does not constitute TI's approval, warranty or endorsement thereof.

## 1 Configuration Summary

The Discovery Controller Board combines hardware, software, firmware and documentation to form a stand-alone platform for use in developing and testing applications designed for using the Texas Instruments 0,7 XGA DDR DMD.

## 2 Bill of Material

ITEM	Qty	PART NUMBER	DESCRIPTION	MANUFACTUER
1	71	ECJ-1VF1H104Z	CAP .1UF,50V,+80-20%Y5V,CER,0603,SMT	PANASONIC
2	3	ECS-T1CX106R	CAP 10 UF,16V,20%,TE,B CASE,SMT	PANASONIC
3	2	ECJ-1VC1H220J	CAP 22PF,50V,5%NPO,CER,0603,SMT	PANASONIC
4	4	ECS-T1VC335R	CAP 3.3UF,35V,20%,TE,C CASE,SMT	PANASONIC
5	3	ECS-T1CY105R	CAP 1UF,16V,20%,TE,A CASE,SMT	PANASONIC
6	1	ECJ-1VB1A224K	CAP .22UF,10V,10%,X7R,CER,0603,SMT	PANASONIC
7	2	ECS-T1AD107R	CAP 100UF,10V,20%,TE,D CASE,SMT	PANASONIC
8	1	ECJ-1VB1H473K	CAP .047UF,25V,10%,X7R,CER,0603,SMT	PANASONIC
